

# CAT 1995 Actual Paper

## Section – I

---

**Direction for question 1 to 10:** Answer the questions based on the following information.

In the following questions, a set of four words is given. Three of the words are related in some way, the remaining word is not related to the rest. You have to pick the word which does not fit in the relation and mark that as your answer.

- |     |             |              |                 |                  |
|-----|-------------|--------------|-----------------|------------------|
| 1.  | a. Couple   | b. Sever     | c. Rend         | d. Lacerate      |
| 2.  | a. Quell    | b. Ruffle    | c. Allay        | d. Control       |
| 3.  | a. Cease    | b. Launch    | c. Initiate     | d. Commence      |
| 4.  | a. Brink    | b. Hub       | c. Verge        | d. Brim          |
| 5.  | a. Eulogy   | b. Panegyric | c. Ignominy     | d. Glorification |
| 6.  | a. Detest   | b. Abhor     | c. Ardour       | d. Loathe        |
| 7.  | a. Adroit   | b. Adept     | c. Dexterous    | d. Awkward       |
| 8.  | a. Taciturn | b. Reserved  | c. Clamorous    | d. Silent        |
| 9.  | a. Sporadic | b. Frequent  | c. Intermittent | d. Scarce        |
| 10. | a. Fanatic  | b. Zealot    | c. Maniac       | d. Rational      |

**Direction for questions 11 to 15:** Answer the questions based on the following information.

In these questions, each sentence has been divided into four parts, marked a, b, c and d. Identify that part of the sentence which needs to be changed for the sentence to be grammatically correct.

- |     |  |   |
|-----|--|---|
| 11. | a. Almost all school teachers insist that<br>c. is responsible for the student's conduct | b. a student's mother<br>d. as well as his dress.                 |
| 12. | a. In the forthcoming elections<br>c. must vote for the candidate                        | b. every man and woman<br>d. of their choice.                     |
| 13. | a. If one has to decide<br>c. you should choose that option                              | b. about the choice of a career<br>d. which is really beneficial. |

14. a. It is essential that diseases like tuberculosis  
c. as early as possible in order to
- b. are detected and treated  
d. assure a successful cure.
15. a. The Mumbai police have found  
c. who they believe to be
- b. the body of a man  
d. the prime suspect in a murder case.

**Direction for questions 16 to 20:** Answer the questions based on the following information.

In each of the following questions, a related pair of words or phrases is followed by five lettered pairs of words or phrases. Select the lettered pair that best expresses a relationship similar to the one expressed in the original pair.

16. Limpid : Murky
- a. Dazed : Clouded  
c. Bright : Gloomy
- b. Obscure : Vague  
d. Nebulous : Dim
17. Ease : Alleviate
- a. Hint : Allocative  
c. Collapse : Rise
- b. Revolt : Repudiate  
d. Question : Interrogate
18. Secret : Clandestine
- a. Overt : Furtive  
c. Open : Closed
- b. Covert : Stealthy  
d. News : Rumour
19. Drama : Audience
- a. Brawl : Vagabonds  
c. Art : Critics
- b. Game : Spectators  
d. Movie : Actors
20. Building : Storey
- a. Book : Chapter  
c. Tree : Stem
- b. Sentence : Adjective  
d. Elephant : Tusk

**Direction for questions 21 to 25:** Answer the questions based on the following information.

In each of these questions, a related pair of words or phrases is followed by a pair of words or phrases. Select the lettered pair that best expresses a relationship that is least similar to the one expressed in the original pair.

21. Germane : Pertinent
- a. Apt : Appropriate  
c. Dull : Sluggish
- b. Quick : Urgent  
d. Excited : Serene
22. Sail : Ship
- a. Propeller : Aeroplane  
c. Hydrogen : Balloon
- b. Radar : Satellite  
d. Accelerator : Car
23. Cosmic : Universe
- a. Terrestrial : Earth  
c. Connubial : Youth
- b. Lunar : Moon  
d. Annular : Ring

38. 1. Conflicting demands for resources are always voiced by different functions/departments in an organization.
- Every manager examines the task entrusted to him and evaluates the resources required.
  - Availability of resources in full measure makes task achievement easy, because it reduces the effort needed to somewhat make-do.
  - A safety cushion is built into demand for resources, to offset the adverse impact of any cut imposed by the seniors.
  - This aspect needs to be understood as a reality.
6. Dynamic, energetic, growth-oriented and wise managements are always confronted with the inadequacy of resources with respect to one of the four Ms (men, machines, money and materials) and the two Ts (time and technology).
- a. DABC                      b. ACBD                      c. ABCD                      d. BCDA
39. 1. Despite the passage of time, a large number of conflicts continue to remain alive, because the wronged parties, in reality or in imagination, wish to take revenge upon each other, thus creating a vicious circle.
- At times, managers are called upon to take ruthless decisions in the long-term interests of the organization.
  - People hurt others, at times knowingly, to teach them a lesson and, at other times, because they lack correct understanding of the other person's stand.
  - The delegation of any power, to any person, is never absolute.
  - Every ruthless decision will be accepted easily if the situation at the moment of committing the act is objectively analysed, shared openly and discussed rationally.
6. Power is misused; its effects can last only for a while, since employees are bound to confront it some day, more so, the talented ones.
- a. BCAD                      b. ADBC                      c. DABC                      d. BADC
40. 1. Managers need to differentiate among those who commit an error once, those who are repetitively errant but can be corrected, and those who are basically wicked.
- The persons in this category will resort to sweet-talk and make all sorts of promises on being caught, but, at the first opportunity will revert to their bad ways.
  - Managers must take ruthless action against the basically wicked and ensure their separation from the organization at the earliest.
  - The first category needs to be corrected softly and duly counselled; the second category should be dealt with firmly and duly counselled till they realize the danger of persisting with their errant behaviour.
  - It is the last category of whom the managers must be most wary.
6. The punishment must be fair and based on the philosophy of giving all the possible opportunities and help prior to taking ruthless action.
- a. ADCB                      b. CDAB                      c. CADB                      d. BDAC

**Direction for questions 41 to 45:** Each of the questions contains six statements followed by four sets of combinations of three. You have to choose that set in which the statements are logically related.

41. 1. Some dubbles are not dubbles                      2. Some dubbles are not dubbles  
 3. Noone who is rubbles is dubbles                      4. All dubbles are rubbles  
 5. Some dubbles are bubbles                      6. Some who are rubbles are not dubbles
- a. 136                      b. 456                      c. 123                      d. 246

48. But because the idea of private property has been permitted to override with its selfishness, the common good of humanity it does not follow that there are not limits within which that idea can function for the general convenience and advantage.

Which of the following is most likely to weaken the argument?

- a. All the people of the society should progress at an equitable rate and there should be no disparities and private property does bring about a tremendous disparity.
  - b. One should not strive for the common good of humanity at all, instead one should be concerned with maximising one's own wealth.
  - c. One should learn from the experiences of former communist nations and should not repeat his mistakes at all.
  - d. Even prosperous capitalist countries like the USA have their share of social problems.
49. Now the audience is a very curious animal. It is shrewd rather than intelligent. Its mental capacity is less than that of its most intellectual members. If these were graded from A to Z, decreasing with succeeding letters to the zero of the hysterical shop-girl, I should say its mental capacity would come around about the letter O.

According to the above statement,

- a. some members in the audience are more intelligent than any of its other members.
  - b. the net intelligence of the audience is a little less than average.
  - c. Only (a)
  - d. Both (a) and (b)
50. I have been studying it, consciously and subconsciously, for 40 years and I still find men unaccountable; people I know intimately can surprise me by some action of theirs which I never thought them capable of or by the discovery of some trait which exhibit a side of themselves that I never even suspected.

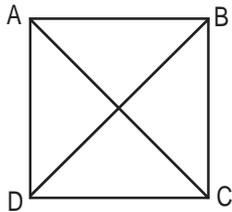

The idea in this sentence can be best summarised as

- a. men are inconsistent and therefore one should not be confident even about one's closest friends.
- b. men are unpredictable, one can never tell what they will do next; hence, one should be very careful in one's dealings.
- c. no matter how closely you know somebody there still exists an unknown facet of his personality.
- d. None of these

## Section – II

**Direction for questions 51 to 53:** Answer these questions independently.

51. ABCD is a square of area 4, which is divided into four non-overlapping triangles as shown in figure. Then the sum of the perimeters of the triangles is

- a.  $8(2 + \sqrt{2})$                       b.  $8(1 + \sqrt{2})$                       c.  $4(1 + \sqrt{2})$                       d.  $4(2 + \sqrt{2})$
52.  $5^6 - 1$  is divisible by  
a. 13                                      b. 31                                      c. 5                                      d. None of these
53. Ram purchased a flat at Rs.1 lakh and Prem purchased a plot of land worth Rs.1.1 lakh. The respective annual rates at which the prices of the flat and the plot increased were 10% and 5%. After two years they exchanged their belongings and one paid the other the difference. Then  
a. Ram paid Rs.275 to Prem                      b. Ram paid Rs.475 to Prem  
c. Ram paid Rs.375 to Prem                      d. Prem paid Rs.475 to Ram

**Direction for questions 54 to 57:** Answer the questions based on the following information.

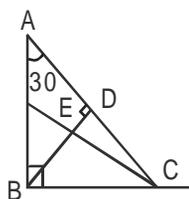

Four sisters — Suvarna, Tara, Uma and Vibha are playing a game such that the loser doubles the money of each of the other players from her share. They played four games and each sister lost one game in alphabetical order. At the end of fourth game, each sister had Rs.32.

54. How many rupees did Suvarna start with?  
a. Rs.60                                      b. Rs.34                                      c. Rs.66                                      d. Rs.28
55. Who started with the lowest amount?  
a. Suvarna                                      b. Tara                                      c. Uma                                      d. Vibha
56. Who started with the highest amount?  
a. Suvarna                                      b. Tara                                      c. Uma                                      d. Vibha
57. What was the amount with Uma at the end of the second round?  
a. 36                                      b. 72                                      c. 16                                      d. None of these

**Direction for questions 58 to 87:** Answer the questions independently.

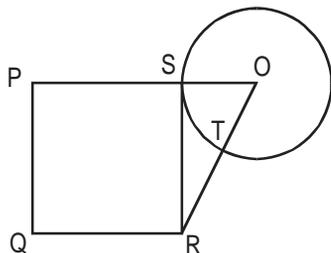

58. 72 hens cost Rs. \_\_\_ 96.7 \_\_\_. Then what does each hen cost, where two digits in place of ' \_\_\_ ' are not visible or are written in illegible hand?  
a. Rs.3.23                                      b. Rs.5.11                                      c. Rs.5.51                                      d. Rs.7.22

59. A person who has a certain amount with him goes to market. He can buy 50 oranges or 40 mangoes. He retains 10% of the amount for taxi fares and buys 20 mangoes and of the balance he purchases oranges. Number of oranges he can purchase is  
 a. 36                                      b. 40                                      c. 15                                      d. 20
60. The value of  $\frac{55^3 + 45^3}{55^2 - 55 \times 45 + 45^2}$  is  
 a. 100                                      b. 105                                      c. 125                                      d. 75
61. Which one of the following cannot be the ratio of angles in a right-angled triangle?  
 a. 1 : 2 : 3                              b. 1 : 1 : 2                              c. 1 : 3 : 6                              d. None of these
62. For the product  $n(n + 1)(2n + 1)$ ,  $n \in \mathbb{N}$ , which one of the following is not necessarily true?  
 a. It is even  
 b. Divisible by 3  
 c. Divisible by the sum of the square of first  $n$  natural numbers  
 d. Never divisible by 237
63. The remainder obtained when a prime number greater than 6 is divided by 6 is  
 a. 1 or 3                                      b. 1 or 5                                      c. 3 or 5                                      d. 4 or 5
64. Boxes numbered 1, 2, 3, 4 and 5 are kept in a row, and they are to be filled with either a red or a blue ball, such that no two adjacent boxes can be filled with blue balls. Then how many different arrangements are possible, given that all balls of a given colour are exactly identical in all respects?  
 a. 8    b. 10    c. 15    d. 22
65.  $AB \perp BC$ ,  $BD \perp AC$  and  $CE$  bisects  $\angle C$ ,  $\angle A = 30^\circ$ . Then what is  $\angle CED$ ?

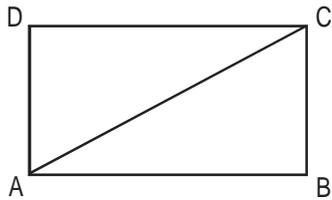

- a.  $30^\circ$                                       b.  $60^\circ$                                       c.  $45^\circ$                                       d.  $65^\circ$
66. A man invests Rs.3,000 at the rate of 5% per annum. How much more should he invest at the rate of 8%, so that he can earn a total of 6% per annum?  
 a. Rs.1,200                                      b. Rs.1,300                                      c. Rs.1,500                                      d. Rs.2,000
67.  $\frac{2}{5}$  of the voters promise to vote for P and the rest promised to vote for Q. Of these, on the last day 15% of the voters went back of their promise to vote for P and 25% of voters went back of their promise to vote for Q, and P lost by 2 votes. Then the total number of voters is  
 a. 100    b. 110    c. 90    d. 95

68. PQRS is a square. SR is a tangent (at point S) to the circle with centre O and TR = OS. Then the ratio of area of the circle to the area of the square is

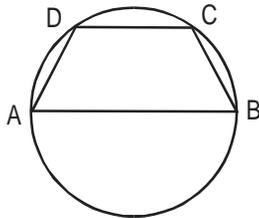

- a.  $\frac{\pi}{3}$                       b.  $\frac{11}{7}$                       c.  $\frac{3}{\pi}$                       d.  $\frac{7}{11}$
69. In a race of 200 m run, A beats S by 20 m and N by 40 m. If S and N are running a race of 100 m with exactly same speed as before, then by how many metres will S beat N?  
a. 11.11 m                      b. 10 m                      c. 12 m                      d. 25 m
70. Three consecutive positive even numbers are such that thrice the first number exceeds double the third by 2, then the third number is  
a. 10                      b. 14                      c. 16                      d. 12
71. A group of men decided to do a job in 8 days. But since 10 men dropped out every day, the job got completed at the end of the 12th day. How many men were there at the beginning?  
a. 165                      b. 175                      c. 80                      d. 90
72. If a 4 digit number is formed with digits 1, 2, 3 and 5. What is the probability that the number is divisible by 25, if repetition of digits is not allowed?  
a.  $\frac{1}{12}$                       b.  $\frac{1}{4}$                       c.  $\frac{1}{6}$                       d. None of these
73. Two typists undertake to do a job. The second typist begins working one hour after the first. Three hours after the first typist has begun working, there is still  $\frac{9}{20}$  of the work to be done. When the assignment is completed, it turns out that each typist has done half the work. How many hours would it take each one to do the whole job individually?  
a. 12 hr and 8 hr                      b. 8 hr and 5.6 hr                      c. 10 hr and 8 hr                      d. 5 hr and 4 hr
74. I live X floors above the ground floor of a high-rise building. It takes me 30 s per floor to walk down the steps and 2 s per floor to ride the lift. What is X, if the time taken to walk down the steps to the ground floor is the same as to wait for the lift for 7 min and then ride down?  
a. 4                      b. 7                      c. 14                      d. 15
75. The sides of a triangle are 5, 12 and 13 units. A rectangle is constructed, which is equal in area to the triangle, and has a width of 10 units. Then the perimeter of the rectangle is  
a. 30 units                      b. 36 units                      c. 13 units                      d. None of these

76. In the adjoining figure,  $AC + AB = 5AD$  and  $AC - AD = 8$ . Then the area of the rectangle ABCD is

- a. 36                                      b. 50                                      c. 60                                      d. Cannot be answered
77. One root of  $x^2 + kx - 8 = 0$  is square of the other. Then the value of k is  
a. 2    b. 8    c. -8    d. -2
78. In the given figure, AB is diameter of the circle and points C and D are on the circumference such that  $\angle CAD = 30^\circ$  and  $\angle CBA = 70^\circ$ . What is the measure of  $\angle ACD$ ?

- a.  $40^\circ$                                       b.  $50^\circ$                                       c.  $30^\circ$                                       d.  $90^\circ$
79. The length of a ladder is exactly equal to the height of the wall it is leaning against. If lower end of the ladder is kept on a stool of height 3 m and the stool is kept 9 m away from the wall, the upper end of the ladder coincides with the top of the wall. Then the height of the wall is  
a. 12 m                                      b. 15 m                                      c. 18 m                                      d. 11 m
80. A stockist wants to make some profit by selling sugar. He contemplates about various methods. Which of the following would maximise his profit?  
I. Sell sugar at 10% profit.  
II. Use 900 g of weight instead of 1 kg.  
III. Mix 10% impurities in sugar and selling sugar at cost price.  
IV. Increase the price by 5% and reduce weights by 5%.  
a. I or III                                      b. II    c. II, III and IV                                      d. Profits are same
81. A man can walk up a moving 'up' escalator in 30 s. The same man can walk down this moving 'up' escalator in 90 s. Assume that his walking speed is same upwards and downwards. How much time will he take to walk up the escalator, when it is not moving?  
a. 30 s    b. 45 s    c. 60 s    d. 90 s
82. Two positive integers differ by 4 and sum of their reciprocals is  $\frac{10}{21}$ . Then one of the numbers is  
a. 3    b. 1    c. 5    d. 21

83. Three bells chime at an interval of 18 min, 24 min and 32 min. At a certain time they begin to chime together. What length of time will elapse before they chime together again?  
 a. 2 hr and 24 min      b. 4 hr and 48 min      c. 1 hr and 36 min      d. 5 hr
84. What is the value of  $m$  which satisfies  $3m^2 - 21m + 30 < 0$ ?  
 a.  $m < 2$  or  $m > 5$       b.  $m > 2$       c.  $2 < m < 5$       d. Both a and c
85. The rate of inflation was 1000%. Then what will be the cost of an article, which costs 6 units of currency now, 2 years from now?  
 a. 666      b. 660      c. 720      d. 726
86. Largest value of  $\min(2 + x^2, 6 - 3x)$ , when  $x > 0$ , is  
 a. 1      b. 2      c. 3      d. 4
87. A, B, C and D are four towns, any three of which are non-collinear. Then the number of ways to construct three roads each joining a pair of towns so that the roads do not form a triangle is  
 a. 7      b. 8      c. 9      d. 24

**Direction for questions 88 to 91:** Answer the questions based on the following information.

$le(x, y)$  = Least of  $(x, y)$

$mo(x) = |x|$

$me(x, y)$  = Maximum of  $(x, y)$

88. Find the value of  $me(a + mo(le(a, b))); mo(a + me(mo(a), mo(b)))$ , at  $a = -2$  and  $b = -3$ .  
 a. 1      b. 0      c. 5      d. 3
89. Which of the following must always be correct for  $a, b > 0$ ?  
 a.  $mo(le(a, b)) \geq (me(mo(a), mo(b)))$       b.  $mo(le(a, b)) > (me(mo(a), mo(b)))$   
 c.  $mo(le(a, b)) < (le(mo(a), mo(b)))$       d.  $mo(le(a, b)) = le(mo(a), mo(b))$
90. For what values of 'a' is  $me(a^2 - 3a, a - 3) < 0$ ?  
 a.  $a > 3$       b.  $0 < a < 3$       c.  $a < 0$       d.  $a = 3$
91. For what values of 'a' is  $le(a^2 - 3a, a - 3) < 0$ ?  
 a.  $a > 3$       b.  $0 < a < 3$       c.  $a < 0$       d. Both b and c

**Direction for questions 92 to 100:** Each of these questions is followed by two statements, I and II. Mark the answer as

- if the question can be answered with the help of statement I alone.
- if the question can be answered with the help of statement II alone.
- if both statement I and statement II are needed to answer the question.
- if the question cannot be answered even with the help of both the statements.

92. If  $x, y$  and  $z$  are real numbers, is  $z - x$  even or odd?  
 I.  $xyz$  is odd.  
 II.  $xy + yz + zx$  is even.

93. What is the value of  $x$ , if  $x$  and  $y$  are consecutive positive even integers?
- $(x - y)^2 = 4$
  - $(x + y)^2 < 100$
94. What is the profit percentage?
- The cost price is 80% of the selling price.
  - The profit is Rs.50.
95. What is the area of the triangle?
- Two sides are 41 cm each.
  - The altitude to the third side is 9 cm long.
96. What is the price of bananas?
- With Rs.84, I can buy 14 bananas and 35 oranges.
  - If price of bananas is reduced by 50%, then we can buy 48 bananas in Rs.12.
97. What is the first term of an arithmetic progression of positive integers?
- Sum of the squares of the first and the second term is 116.
  - The fifth term is divisible by 7.
98. What is the length of rectangle ABCD?
- Area of the rectangle is 48 square units.
  - Length of the diagonal is 10 units.
99. What is the number  $x$ ?
- The LCM of  $x$  and 18 is 36.
  - The HCF of  $x$  and 18 is 2.
100. Is  $x + y - z + t$  even?
- $x + y + t$  is even.
  - $t$  and  $z$  are odd.

## Section – III

---

**Direction for questions 101 to 150:** This section contains passages followed by questions based upon the content of the passages. Read the passages and select the best option for the answers.

### Passage – 1

The Republican Party has lost its mind. To win elections, a party obviously needs votes and constituencies. However first, it needs an idea. In 1994-95, the Republican Party had after a long struggle advanced a coherent, compelling set of political ideas expressed in a specific legislative agenda. The political story of 1996 is that this same party, within the space of six weeks, became totally, shockingly intellectually deranged.

Think back. The singular achievement of the House Speaker Newt Gingrich's 1994 revolution was that it swept into power united behind one comprehensive ideological goal: dismantling the welfare state. Just about anything in the contract with America and the legislative agenda of the 104th Congress is a mere subheading: welfare reform, tax cuts, entitlement reform, returning power to the states, the balanced budget (a supremely powerful means for keeping the growth of government in check).

The central Republican idea was that the individual, the family, the church, the schools — civil society — were being systematically usurped and strangled by the federal behemoth Republicans who were riding into Washington to slay it.

With this idea they met Clinton head-on in late 1995. And although they were tactically defeated — the government shutdown proved a disaster for Republicans — they won philosophically. Clinton conceded all their principles. He finally embraced their seven year balanced budget. Then, in a State of the Union speech that might have been delivered by a moderate Republican, he declared, "The era of Big Government is over," the dominant theme of the Gingrich Revolution.

It seems so long ago. Because then, astonishingly, on the very morrow of their philosophical victory, just as the Republicans prepared to carry these ideas into battle in November, came cannon fire from the rear. The first Republican renegade to cry 'Wrong!' and charge was Steve Forbes. With his free-lunch, tax-cutting flat tax, he declared the balanced budget, the centrepiece of the Republican revolution, unnecessary. Then, no sooner had the Forbes mutiny been put down than Pat Buchanan declared a general insurrection. He too declared war on the party's central ideology in the name not supply side theory but of class warfare, the Democratic weapon of choice against Republicanism.

The enemy, according to Buchanan, is not the welfare state. It is that conservative icon, capitalism, with its ruthless captains of industry, greedy financiers and political elite (Republicans included, of course). All three groups collaborate to let foreigners — immigrants, traders, parasitic foreign-aid loafers — destroy the good life of the ordinary American worker.

Buchananism holds that what is killing the little guy in America is the Big Guy, not Big Government. It blames not an overreaching government that tries to insulate citizens from life's buffeting to the point where it creates deeply destructive dependency, but an uncaring government that does not protect its victim-people enough

from that buffeting. Buchanan would protect and wield a mighty government apparatus to do so, government that builds trade walls and immigrant — repelling fences, that imposes punitive taxes on imports, that policies the hiring and firing practices of business with the arrogance of the most zealous affirmative action enforcer.

This is Reaganism standing on its head. Republicans have focused too much on the mere technical dangers posed by this assault. Yes, it gives ammunition to the Democrats. Yes, it puts the eventual nominee through a bruising campaign and delivers him tarnished and drained into the ring against Bill Clinton.

But the real danger is philosophical, not tactical. It is axioms, not just policies, that are under fire. The Republican idea of smaller government is being proud to dust — by Republicans. In the middle of an election year, when they should be honing their themes against Democratic liberalism, Buchanan's rise is forcing a pointless rearguard battle against a philosophical corpse, the obsolete Palaeo conservatism — a mix of nativism, protectionism and isolationism of the 1930s.

As the candidates' debate in Arizona last week showed, the entire primary campaign will be fought on Buchanan's grounds, fending off his Smoot-Hawley-Franco populism. And then what? After the convention, what does the nominee do? Try to resurrect the anti-welfare state themes of the historically successful 1994 congressional campaign? Well, yes, but with a terrible loss of energy and focus — and support. Buchanan's constituency, by then convinced by their leader that the working man's issues have been pushed aside, may simply walk on election day or, even worse, defect to the Democrats. After all, Democrats fight class war very well.

Political parties can survive bruising primary battles. They cannot survive ideological meltdown. Dole and Buchanan say they are fighting for the heart and soul of the Republican Party, heart and soul, however, will get you nowhere when you've lost your way — and your mind.

101. Which broad ideology helped Newt Gingrich lead the Republican revolution of 1994?
  - a. Tax cuts
  - b. Entitlement reform
  - c. Welfare reform
  - d. Welfare state dismantling
102. Assuming the passage to be truthful, what does a party not need to win elections?
  - a. Votes
  - b. Money
  - c. Constituencies
  - d. Ideas
103. Which of the following is not a Republican?
  - a. Newt Gingrich
  - b. Pat Buchanan
  - c. Bob Dole
  - d. None of these
104. The Republicans were tactically defeated by the Democrats because
  - a. of the shutdown of the government.
  - b. the balanced budget plan failed.
  - c. Steve Forbes led a revolution.
  - d. Bill Clinton pre-empted them.
105. Which of the following would be a suitable title for the passage?
  - a. *The Democrats: Victory in Sight*
  - b. *Follies and Foibles of the Republican Party*
  - c. *Republicans — Are You Crazy?*
  - d. *Mutinies on the Republican Party.*
106. The word 'obsolete' in the context of the passage means
  - a. antiquated.
  - b. absolute.
  - c. boring.
  - d. miasmatic.

107. What, according to the author, is the real danger for Republicans?
- The fact that small government is being ground to dust.
  - The fact that Bill Clinton is gaining popularity.
  - The fact that it is axioms, and not just policies that are under fire.
  - The fact that the eventual nominee would be too tired to fight an election against Clinton.
108. Which of the following, according to Buchanan, is not an enemy?
- Big government
  - Immigrants
  - Captains of industry
  - Foreign-aid requesters

## Passage – 2

Icicles — two metres long and, at their tips, as bright and sharp as needles — hang from the caves: wild ice stalactites, dragon's teeth. I peer through them to see the world transformed to abstract. Little snow tornadoes twirl across the blank. The car is out there somewhere, represented by a subtle bump in the snow-field. The old geep truck, a larger beast, is up to its door handles, like a sinking remnant: dinosaur yielding to ice age. The town's behemoth snow-plow passes on the road, dome light twirling, and casts aside a frozen doe that now lies, neck broken, upon the roadside snow-bank, soon to vanish under the snowfall still to come.

There is double-jointed consciousness at work in the dramatics of big weather. Down in the snowstorm, we are as mortal as the deer. I sink to my waist in a drift; I panic, my arms claw for an instant, like a drowning swimmer's, in the powder. Men up and down the storm collapse with coronaries, snow shovels in their hands, cheeks turned into a deathly colour, like frost-bitten plums.

Yet when we go upstairs to consult the Weather Channel, we settle down, as cosy gods do, to hover high above the earth and watch the play with a divine perspective. Moist air labelled L for low rides up the continent from the Gulf of Mexico and collides with the high that has slid down from the North Pole. And thus is whipped up the egg-white fluff on the studio map that, down in the frozen, messy world, buries mortals.

An odd new metaphysics of weather: It is not that weather has necessarily grown more apocalyptic. The famous 'Winter of the Blue Snow' of 1886-87 turned rivers of the American West into glaciers that when they thawed, carried along inundation of dead cattle. President Theodore Roosevelt was virtually ruined as a rancher by the weather that destroyed 65 per cent of his herd. In 1811 Mississippi river flowed briefly because of the New Madrid earthquake.

What's new in America is the theatre of it. Television does not create weather; any more than it creates contemporary politics. However, the ritual ceremonies of televised weather have endowed a subject often previously banal with an amazing life as mass entertainment, nationwide interactive preoccupation and a kind of immense performance art.

What we have is weather as electronic American Shintoism, a casual but almost mystic daily religion, wherein nature is not inert but restless, stirring alive with kinetic fronts and meanings and turbulent expectations (forecasts, variables, prophecies). We have installed an elaborate priesthood and technology of interpretation: acolytes and satellites preside over snow and circuses. At least major snowstorms have about them an innocence and moral neutrality that is more refreshing than the last national television spectacle, the O. J. Simpson trial.

114. According to the author, one of the greatest attractions of the weather is that  
a. it is politicized      b. it is apolitical      c. it is reckless      d. it is beautiful
115. What is most probably the physical position of the author of the passage?  
a. In his house      b. In a snowstorm      c. In his office      d. In a bunk
116. Which of the following is not true of the weather?  
a. It is a moral equivalent of war      b. It is pleasantly manipulable  
c. It is a levelling force      d. It dramatises man's insignificance
117. The word 'undulously' in the context of the passage means  
a. unduly      b. indomitably      c. powerful      d. curved

### Passage – 3

Among those who call themselves socialists, two kinds of persons may be distinguished. There are, in the first place, those whose plans for a new order of society, in which private property and individual competition are to be superseded and other motives to action substituted, are on the scale of a village community or township, and would be applied to an entire country by the multiplication of such self-acting units; of this character are the systems of Owen, of Fourier, and the more thoughtful and philosophic socialists generally. The other class, which is more a product of the continent than of Great Britain and may be called the revolutionary socialists, has people who propose to themselves a much bolder stroke. Their scheme is the management of the whole productive resources of the country by one central authority, the general government. And with this view some of them avow as their purpose that the working classes, or somebody on their behalf, should take possession of all the property of the country, and administer it for the general benefit.

Whatever may be the difficulties of the first of these two forms of socialism, the second must evidently involve the same difficulties and many more. The former, too, has the great advantage that it can be brought into operation progressively, and can prove its capabilities by trial. It can be tried first on a select population and extended to others as their education and cultivation permit. It need not, and in the natural order of things would not, become an engine of subversion until it had shown itself capable of being also a means of reconstruction. It is not so with the other; the aim of that is to substitute the new rule for the old at a single stroke, and to exchange the amount of good realised under the present system, and its large possibilities of improvement, for a plunge without any preparation into the most extreme form of the problem of carrying on the whole round of the operations of social life without the motive power which has always hitherto worked the social machinery. It must be acknowledged that those who would play this game on the strength of their own private opinion, unconfirmed as yet by any experimental verification — who would forcibly deprive all who have now a comfortable physical existence of their only present means of preserving it, and would brave the frightful bloodshed and misery that would ensue if the attempt was resisted — must have a serene confidence in their own wisdom on the one hand and the recklessness of other people's sufferings on the other, which Robespierre and St. Just, hitherto the typical instances of those united attributes, scarcely came up to. Nevertheless this scheme has great elements of popularity which the more cautious and reasonable form of socialism has not; because what it professes to do, it promises to do quickly, and holds out hope to the enthusiastic of seeing the whole of their aspirations realised in their own time and at a blow.

118. Who among of the following is not a socialist?  
a. Robespierre                      b. Fourier                      c. Owen                      d. All are socialists
119. Which of the following, according to the author, is true?  
a. The second form of socialism has more difficulties than the first.  
b. The second form of socialism has the same difficulties as the first.  
c. The second form of socialism has less difficulties than the first.  
d. The author has not compared the difficulties of the two.
120. According to the author, the difference between the two kinds of socialists is that  
a. one consists of thinkers and the others are active people.  
b. the first have a definite philosophy and the second don't have any definite philosophy.  
c. the first believe in gradual change while the others believe in revolutionary change.  
d. the first are the products of Britain, while the others are products of Russia.
121. Which of the following were characteristics of St. Just and Robespierre?  
a. Unconcern for other's suffering                      b. Full confidence in their own wisdom  
c. Both (a) and (b)                      d. Neither (a) nor (b)
122. Which of the following according to the author, may not be the result of not verifying the desirability of socialism experimentally first?  
a. Bloodshed                      b. Deprivation of current comfortable existence  
c. Corruption in high places                      d. Misery caused by resisting the change
123. According to the philosophy of revolutionary socialism,  
a. the government takes over the villages first, and then gradually the whole country.  
b. the government takes over all productive resources of the country at one stroke.  
c. the government declares a police state and rules by decree.  
d. there is no government as such: the people rule themselves by the socialist doctrine.
124. The word 'avow' in the context of the passage means  
a. proclaim                      b. vow                      c. affirm                      d. deny
125. It may be inferred from the passage that the author's sympathies are for  
a. neither side.                      b. the side of the socialist doctrine.  
c. the second type of socialism.                      d. the first type of socialism.

## Passage – 4

Whatever philosophy may be, it is in the world and must relate to it. It breaks through the shell of the world in order to move into the infinite. But it turns back in order to find in the finite its always unique historical foundation. It pushes into the furthest horizons beyond being-in-the-world in order to experience the present in the eternal. But even the profoundest meditation acquires its meaning by relating back to man's existence here and now. Philosophy glimpses the highest criteria, the starry heaven of the possible, and seeks in the light of the seemingly impossible the way to man's dignity in the phenomenon of his empirical existence. Philosophy addresses itself to individuals. It creates a free community of those who rely on each other in their will for truth. Into this community the philosophic man would like to enter. It is there in the world all the time, but cannot become a worldly institution without losing freedom of its truth. He cannot know whether he belongs to it. No authority decides on his acceptance. He wants to live in his thinking in such a way as to make his acceptance possible. But how does the world relate to philosophy? There are chairs of philosophy at the universities. Nowadays they are an embarrassment. Philosophy is politely respected because of tradition, but despised in secret. The general opinion is: it has nothing of importance to say. Neither has it any practical value. It is named in public but does it really exist? Its existence is proved at least by the defence measures it provokes. We can see this in the form of comments like: Philosophy is too complicated. I don't understand it. It's beyond me. It's something for professionals. I have no gift for it. Therefore it doesn't concern me. But that is like saying : I don't need to bother work or scholarship without thinking or questioning its meaning, and, for the rest, have 'opinions' and be content with that. The defence becomes fanatical. A benighted vital instinct hates philosophy. It is dangerous. If I understood it I would have to change my life. I would find myself in another frame of mind, see everything in a different light, have to judge anew. Better now think philosophically! Then come the accusers, who want to replace the obsolete philosophy by something new and totally different. It is mistrusted as the utterly mendacious end product of a bankrupt theology. The meaninglessness of philosophical propositions is made fun of. Philosophy is denounced as the willing handmaiden of political and other powers. For many politicians, their wretched trade would be easier if philosophy did not exist at all. Masses and functionaries are easier to manipulate when they do not think but only have a regimented intelligence. People must be prevented from becoming serious. Therefore, it is better for philosophy to be boring. Let the chairs of philosophy rot. The more piffle is taught, the sooner people will be blinkered against the light of philosophy. Thus philosophy is surrounded by enemies, most of whom are not conscious of being such. Bourgeois complacency, conventionality, the satisfactions of economic prosperity, the appreciation of science only for its technical achievements, the absolute will to power, the bonhomie of politicians, the fanaticism of ideologies, the literary self-assertiveness of talented writers — in all these things people parade their anti-philosophy. They do not notice it because they do not realise what they are doing. They are unaware that their anti-philosophy is in itself a philosophy, but a perverted one, and that this anti-philosophy, if elucidated, would annihilate itself.

126. A suitable title for the passage would be

a. *Man and Philosophy*

b. *Philosophical Angst*

c. *A Defence of Philosophy*

d. *The Enemies of Philosophy*

127. Which of the following is true, keeping the passage in mind?

a. Philosophy is evidently respected

b. Philosophy is secretly despised

c. Both (a) and (b)

d. Neither (a) nor (b)

128. Which of the following is not a charge against philosophy?
- That it is obsolete
  - That it is mendacious
  - That it is the handmaiden of political powers
  - That it is immoral
129. Which of the following is not mentioned as a function of philosophy in the passage?
- It shows the way to man's dignity in the face of his empirical existence.
  - It breaks through the shell of the world in order to move into the infinite.
  - It pushes into the furthest horizons beyond being in the world.
  - It makes the world a better place to live in.
130. Why according to the passage, would the politicians be happy if philosophy did not exist?
- Masses would be easier to manipulate as they would not think for themselves.
  - They would not have to make false allegiances to ideologies.
  - They would not have to face allegations of ignoring philosophy.
  - They would not have to be philosophical about losing an election.
131. The word 'chairs', in the context of the passage, means
- wooden-faced people.
  - departments.
  - separate chairs for philosophers.
  - reserved seats for students of philosophy.
132. According to the author, the existence of philosophy is proved by
- the fact that there are still chairs of philosophy in universities.
  - the defence measures it provokes.
  - the polite respect it gets.
  - the fact that it answers the fundamental questions of life.

### Passage – 5

Even if we're a bit snooty about them, we should go down on our knees and thank heaven for movies like *Jurassic Park* and directors like Steven Spielberg who make them. They fill the cinemas, if only because the hype is virtually irresistible. And because they do so, hundreds of maniacs all over the world continue to finance films. But is this an example of a worldwide jackpot movie? Yes and no. Yes, because it delivers dinosaurs by the dozen, in as weird a fashion as have been seen on the screen before. And no, because the accompanying story, courtesy Michael Crichton, has little of the real imagination that made Spielberg's *ET* and *Close Encounters* into the jackpot movies of their time. Technically, it works like a dream but, as a cinematic dream, it's unmemorable. This may be because of its cardboard human characters, dwarfed by the assemblage of their prehistoric ancestors and serviced by a screenplay that makes the abortive mating calls of this weirdly asexual zoo seem eloquent in comparison. What kind of park is this?, enquires Sam Neil. "Oh, it's right up your alley", says Richard Attenborough. More likely, though it has something to do with the development of the story which at no point engages us properly on the human level, except perhaps to hope that the kids and Neil's grumpy scientist who learns to love them will finally escape from the grasp of the velociraptors chasing them. We're looking at

nothing but stunts, and they get tiresome laid end to end. Crichton's book was scarcely much better but at least it had a convincing villain in John Hammond, *Jurassic Park's* billionaire developer, whereas Attenborough's approximation seems merely enthusiastically misguided. And Crichton's warning of what might happen if we muck about with nature becomes weaker in the film. What we actually have in *Jurassic Park* is a non-animated Disney epic with affiliations to *Jaws* which seems to amuse and frighten but succeeds in doing neither well enough to count. Its real interest lies in how Spielberg's obsession with childhood now manifests itself in his middle age. It looks like being on automatic pilot — gestural rather than totally convinced but determined to remain the subject of analytical study. The whole thing, of course, is perfectly adequate fun once the ludicrously simplistic explanation of DNA has been traversed in Hammond's costly futuristic, computerised den. Even I could understand it. Thereafter, the theme park's creaky inability to deal with an ordinary old typhoon as its VIPs travel around hoping the investment will work, leads to predictable disasters, proficiently worked out but never truly frightening. But then this is a film for children of all ages, except perhaps those under 12, and one shouldn't expect sophistication on other than the technological level. *Jurassic Park* is more of a roller-coaster ride than a piece of real cinema. It delivers, but only on a certain plane. Even the breaking of the barriers between our civilization and a monstrous past doesn't have the kick it could have had.

Possibly one is asking for a different film which in the end would not have appealed across the box-office spectrum as well as this obviously does. But still one leaves it vaguely disappointed. All that work and just a mouse that roars. It's wonderful story, but told with more efficiency than inspiration — possibly a sign of the times, along with the merchandising spree which follows it so readily.

133. Which of the following has not been mentioned as a Steven Spielberg movie in the passage?
- a. *Jaws*
  - b. *ET*
  - c. *Close Encounters*
  - d. *Jurassic Park*
134. In which way does the author find the film inferior to the original book?
- a. The book is more interesting.
  - b. The book had a more convincing villain.
  - c. The book is easier to understand.
  - d. The story had a good author but a bad director.
135. The passage is most probably
- a. a book review.
  - b. a film critic's comments.
  - c. a film review.
  - d. a magazine article.
136. The book *Jurassic Park* is written by
- a. Crichton
  - b. Attenborough
  - c. Hammond
  - d. Neil
137. Which of the following does the author say of the film?
- a. The film is technically inferior and does not have a good storyline.
  - b. The film is technically inferior but has a good storyline.
  - c. The film is technically slick but does not have a good storyline.
  - d. The film is technically slick and has a good storyline.
138. The writer's opinion of the film *Jurassic Park* may be said to be
- a. very favourable.
  - b. very depressing.
  - c. excellent.
  - d. not very favourable.

139. Why according to the author, should we thank heaven for movies like *Jurassic Park*, even though they may not be very good aesthetically?
- a. Because they fill the halls, and thus people will finance more films.
  - b. Because it is one of the major hits of the year.
  - c. Because the film has brilliant technical wizardry.
  - d. Because of the hundreds of films being produced, this is one of the few excellent ones.
140. According to the author, *Jurassic Park*
- a. is very amusing.
  - b. is very frightening.
  - c. Both (a) and (b)
  - d. Neither (a) nor (b)
141. The phrase 'muck about', in the context of the passage, means
- a. make dirty
  - b. interfere with
  - c. be frivolous about
  - d. to mask

### Passage – 6

The opinion polls had been wrong. Although they were signalling a weakening in Labour's lead in the days before the general election — which pointed to a hung parliament — many working-class voters had been embarrassed to tell middle-class pollsters that they were intending to vote Labour. The final result on April 9, 1992, which gave Neil Kinnock a working majority of 30, was a turnaround of the century.

As John Major cleared his desk in Downing Street, pundit after pundit lined up to criticise his lacklustre campaign. The trouble was, they all agreed, that the Conservative Party no longer had a message or political purpose. Its representation in the north of England was decimated; its future as a national party doubtful.

For Kinnock the victory was a sweet reward for nine years of Herculean labour in making his party electable. Not only had he a working majority, but the divisions in Conservative ranks — between anti-Europeans, free marketers and moderates — threatened to split the party. Having set himself the objective of heading a two or three term government, Kinnock made his cabinet appointments with the long haul in mind. There were few surprises. John Smith, with whom he coexisted uneasily, was made chancellor; Roy Hattersley became home secretary; Gerald Kaufmann went to the foreign office; inveterate Euro-sceptic Bryan Gould took over environment; and Gordon Brown went to trade. It was, as many commentators conceded, a much more heavyweight cabinet than any of the Conservatives could have mustered.

But the new cabinet was to have its first trial of strength very soon. The problem was the foreign exchange markets. Although both Kinnock and Smith had, throughout, the election campaign, reaffirmed their commitment to hold the pound's parity at 2.95DM inside the ERM, the foreign exchange markets simply did not believe them. Every previous Labour government had devalued; what reason was there to suppose this one would be different?

The pressure built up immediately. On Friday, April 10, the Bank of England managed to hold the line only by spending £4 billion — around a sixth of its total reserves — to support the exchange rate. But late that night, as the New York markets closed, the Governor of the Bank of England led the deputation to a meeting at 11, Downing Street with Smith and the permanent secretary to the Treasury, Sir Terence Burns. If, said the governor,

the pound was to survive the coming week inside the ERM, then Smith would have to demonstrate his resolve by raising interest rates — by at least 2 per cent. It would also help, added the officials, if the government were to commit Britain to full monetary union and to meet the Maastricht criteria for a single currency. This would mean that both the taxation from Smith's first budget would have to be used to reduce government borrowing and the manifesto promises to raise child benefit and pensions be postponed.

Smith listened to Eddie George — number two at the Bank of England and the arbiter of British exchange rate policy — explain that, at the current rate of reserve loss, Britain's reserves would have run out by the following weekend. The markets needed decisive action. And they needed to know, by the night of Sunday, April 12, at the very latest, what the government would do when the far-eastern markets opened after the weekend. Sir Terence advised that once the markets recognised the government was resolved to hold the exchange rate, pressure would quickly subside and the interest rate increases could be reversed. The name of the game was earning credibility.

Although Smith had been warned to expect a Treasury/Bank of England move to assert the canons of economic orthodoxy, he had hoped to have been more than a few hours into his chancellorship before the pressures started to mount. As it stood, he felt like the victim of a coup and wondered to what extent the foreign exchange market selling had been prompted by the Bank of England's ham fisted intervention — almost designed to manufacture a run on the pound. In any case, he could do nothing without conferring with the prime minister.

In fact Kinnock had asked Smith to have the preliminary Bank of England meeting without him. Although he was not at one with his chancellor over economic policy and distrusted his judgement, he wanted to complete his cabinet appointments — and confer with his own advisers about how to react to what he knew the bank and treasury recommendations would be. He was determined to avoid being bounced into decisions before he had decided his line.

The alternative was to apply to the EC for a realignment conference, in which many more currencies would be devalued. But that could hardly be done then; it would have to wait until the following weekend. And it was not clear if the pound would be devalued sufficiently, or if other countries would follow the British lead. Not only might Britain have to devalue alone, it might not secure a devaluation large enough to make a difference; and be accompanied by higher interest rates.

142. The word 'pundit', in the context of the passage, means
- a. a religious leader      b. a psychologist      c. an expert      d. a paleontologist
143. What was the main problem facing the new cabinet?
- a. The dissension in the ranks of the party.      b. The devaluation of the currency.  
c. The foreign exchange market problem.      d. The monetary union problem.
144. Who, according to the passage, is the leader of the Labour Party?
- a. Neil Kinnock      b. John Smith      c. Gerald Kaufmann      d. Roy Hattersley
145. What, according to the treasury secretary, was the only way out of the exchange problem?
- a. Devaluation of the currency      b. Rise in interest rates  
c. Government spending      d. Raising taxes

146. It may be inferred from the passage that
- a. the Bank of England would go along with whatever the government decided.
  - b. the prime minister was a puppet in the hands of the Bank of England.
  - c. the Bank of England was completely independent of the government.
  - d. the Bank of England could put enormous pressure on the government to formulate policy.
147. Why did Kinnock ask Smith to attend the Bank of England meeting without him?
- a. Because he did not get along with Smith.
  - b. Because he wanted to use that time to confer with others.
  - c. Because he already met them and did not want to meet them again.
  - d. Because he was afraid of being censured by them.
148. Why, according to the author, was the realignment conference not a viable option for the government?
- a. Because other countries may not follow the British lead in devaluation.
  - b. Because the higher interest rates to be given by Britain may deplete resources further.
  - c. Both (a) and (b)
  - d. Neither (a) nor (b)
149. Which of the following do not belong to the Labour cabinet?
- a. Mr John Smith
  - b. Mr Bryan Goul
  - c. Mr Maastricht
  - d. Mr G. Brown
150. What, according to the passage, was not a reason for the defeat of the Conservative Party?
- a. A lacklustre campaign
  - b. Wrong policies
  - c. No special message
  - d. No political purpose

## Section – IV

**Direction for questions 151 to 155:** Answer the questions based on the following information.

Ghosh Babu surveyed his companies and obtained the following data. Income tax is paid from profit before tax and the remaining amount is apportioned to dividend and retained earnings. The retained earnings were accumulated into reserves. The reserves at the beginning of 1991 were Rs.80 lakh.

Figure (in Rs. lakh)	1994	1993	1992	1991
Share capital	310	205	98	98
Sales	6435	4725	2620	3270
Profit before Tax	790	525	170	315
Dividends	110	60	30	30
Retained earnings	400	245	70	14

151. In which year was the tax per rupee of 'profit before tax' lowest?  
a. 1991                                      b. 1992                                      c. 1993                                      d. 1994
152. In which year was the sales per rupee of share capital highest?  
a. 1991                                      b. 1992                                      c. 1993                                      d. 1994
153. In which year was the profit before tax per rupee of sales highest?  
a. 1991                                      b. 1992                                      c. 1993                                      d. 1994
154. In which year was the percentage addition to reserves over previous years reserves the highest?  
a. 1991                                      b. 1992                                      c. 1993                                      d. 1994
155. Amount of the reserves at the end of 1994 is  
a. Rs.935 lakh                              b. Rs.915 lakh                              c. Rs.230 lakh                              d. None of these

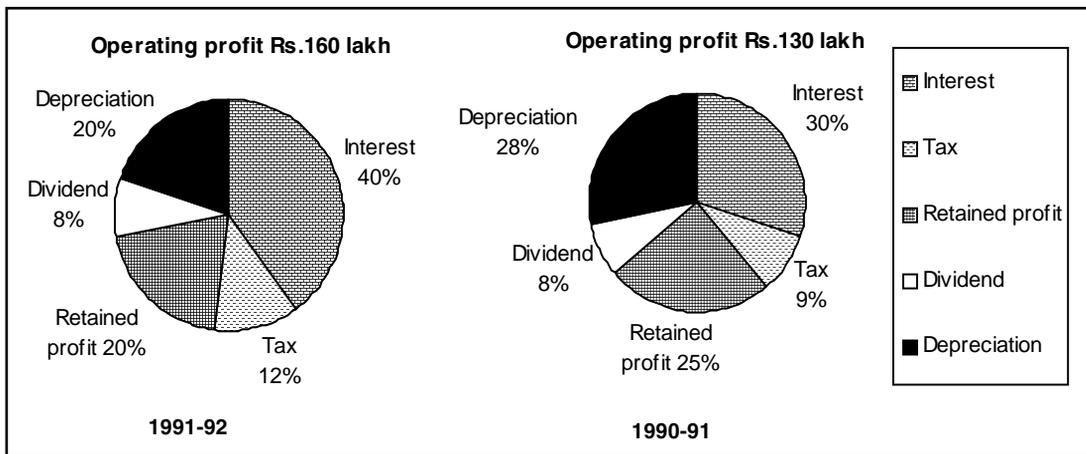

**Direction for questions 156 to 160:** Answer the questions based on the following table.

Market share in four metropolitan cities				
Period/ Product	Mumbai 1993-94	Kolkata 1993-94	Delhi 1993-94	Chennai 1993-94
HD	20-15	35-30	20-15	20-30
CO	20-25	30-15	15-10	20-15
BN	45-40	25-35	35-35	10-10
MT	15-20	10-20	10-10	50-45

156. The maximum percentage decrease in market share is  
a. 60%                                      b. 50%                                      c. 53.3%                                      d. 20%

157. The city in which minimum number of products increased their market shares in 1993-94 is  
 a. Mumbai                      b. Delhi                      c. Kolkata                      d. Chennai
158. The market shares of which products did not decrease between 1993-94 in any city?  
 a. HD                      b. CO                      c. BN                      d. None of these
159. The number of products which had 100% market share in four metropolitan cities is  
 a. 0                      b. 1                      c. 2                      d. 3
160. The number of products which doubled their market shares in one or more cities is  
 a. 0                      b. 1                      c. 2                      d. 3

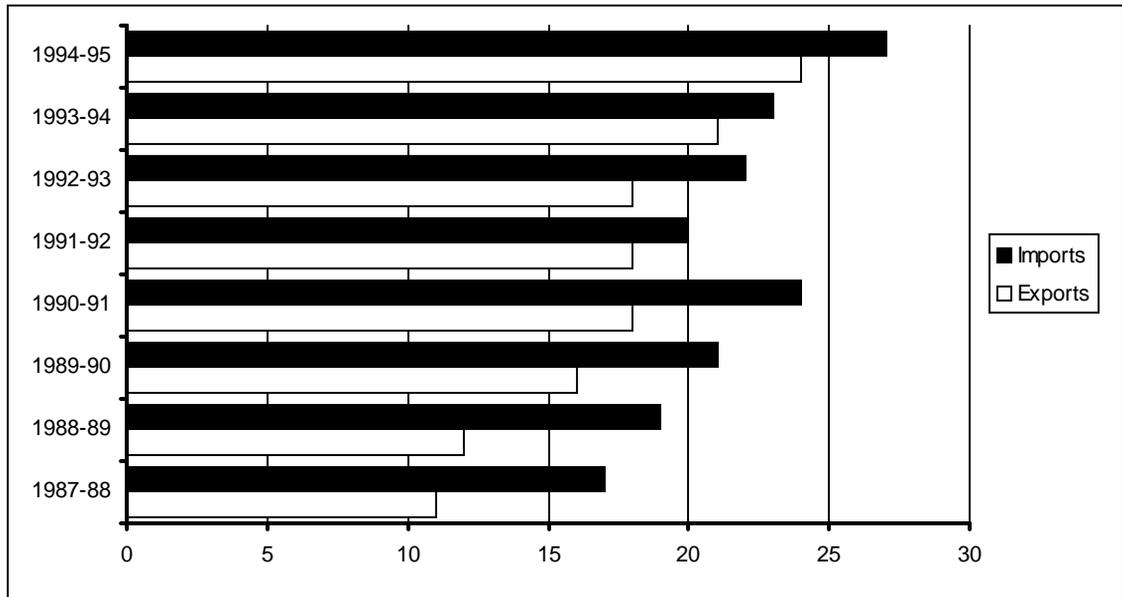

**Direction for questions 161 to 165:** Answer the questions based on the following piecharts.

161. The operating profit in 1991-92 increased over that in 1990-91 by  
 a. 23%                      b. 22%                      c. 25%                      d. 24%
162. The interest burden in 1991-92 was higher than that in 1990-91 by  
 a. 50%                      b. Rs.25 lakh                      c. 90%                      d. Rs.41 lakh
163. If on an average, 20% rate of interest was charged on borrowed funds, then the total borrowed funds used by this company in the given two years amounted to  
 a. Rs.221 lakh                      b. Rs.195 lakh                      c. Rs.368 lakh                      d. Rs.515 lakh
164. The retained profit in 1991-92, as compared to that in 1990-91 was  
 a. higher by 2.5%                      b. higher by 1.5%                      c. lower by 2.5%                      d. lower by 1.5%
165. The equity base of these companies remained unchanged. Then the total dividend earning by the share holders in 1991-92 is  
 a. Rs.104 lakh                      b. Rs.9 lakh                      c. Rs.12.8 lakh                      d. Rs.15.6 lakh

Direction for questions 166 to 170: Answer the questions based on the following graph.

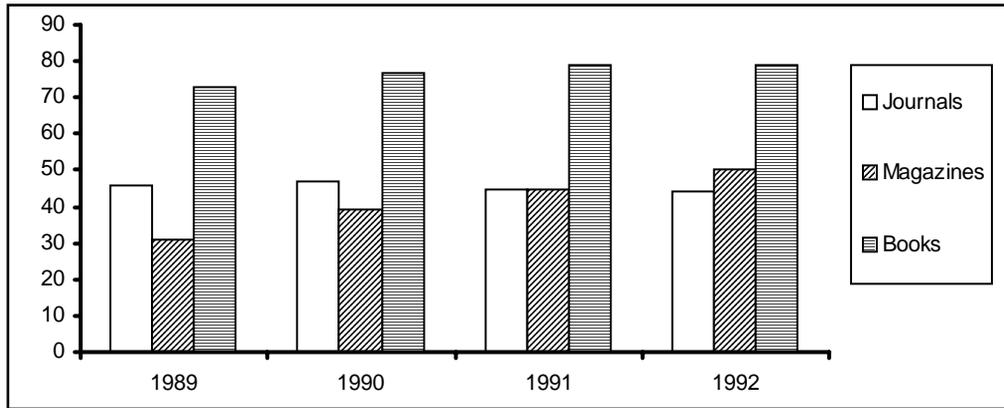

Foreign trade (in billion dollars)

166. In which year was the trade deficit highest?  
 a. 1987-88                      b. 1988-89                      c. 1989-90                      d. 1990-91
167. In how many years was the trade deficit less than the trade deficit in the succeeding year?  
 a. 1                                  b. 2                                  c. 3                                  d. 4
168. Export earning in 1990-91 is how many per cent of imports in 1991-92?  
 a. 82%                              b. 85%                              c. 90%                              d. 15%
169. In the last three years, the total export earnings have accounted for how many per cent of the value of the imports?  
 a. 80%                              b. 83%                              c. 95%                              d. 88%
170. Which of the following statements can be inferred from the graph?  
 I. In all the years shown in the graph, the trade deficit is less than the export earning.  
 II. Export earnings increased in every year between 1989-90 and 1991-92.  
 III. In all the years shown in the graph, the earning by exports is less than the expenditure on imports in the preceding year.  
 a. I only                              b. II only                              c. III only                              d. I and III only

**Direction for questions 171 to 175:** Answer the questions based on the following graph.

Revenue obtained by a publishing house while selling books, magazines and journals (Rs.in lakh).

171. Which year shows the highest change in revenue obtained from journals?  
 a. 1989                      b. 1990                      c. 1991                      d. 1992
172. In 1992, what per cent of the total revenue came from books?  
 a. 45%                      b. 55%                      c. 35%                      d. 25%
173. The number of years in which there was an increase in revenue from at least two categories is  
 a. 1                      b. 2                      c. 3                      d. 4
174. If 1993 were to show the same growth as 1992 over 1991, the revenue in 1993 must be  
 a. Rs.194 lakh              b. Rs.187 lakh              c. Rs.172 lakh              d. Rs.177 lakh
175. The growth in total revenue from 1989 to 1992 is  
 a. 21%                      b. 28%                      c. 15%                      d. 11%

**Direction for questions 176 to 180:** Answer the questions based on the following table.

Machine M1 as well as machine M2 can independently produce either product P or product Q. The time taken by machines M1 and M2 (in minutes) to produce one unit of product P and product Q are given in the table below: (Each machine works 8 hour per day).

Product	M1	M2
P	10	8
Q	6	6

176. What is the maximum number of units that can be manufactured in one day?  
 a. 140                      b. 160                      c. 120                      d. 180
177. If M1 works at half its normal efficiency, what is the maximum number of units produced, if at least one unit of each must be produced?  
 a. 96                      b. 89                      c. 100                      d. 119
